Work experience

FEB 2010 - PRESENT
FREELANCE
(michelhiemstra.nl, oozio.nl)

Since February 2010 I started freelancing in the Internet industry. I work with partners and my own customers, mainly in the Netherlands. My work is mainly developing applications and websites as PHP programmer. I work from the office and on location if desired by the customer. For more information or to hire my services please contact me.

APRIL 2006 - FEB 2010
ROYALPINK
(www.royalpink.nl)

In April 2006 I joined Royal Pink, and I was working as a PHP programmer, I had the following tasks: developing high quality internet applications, documenting my projects, maintaining various websites and customer relationships. At Royal Pink I worked in a small team of young, passionate developers.

Continued- experience

JAN 2006 - 2010
BRILLIANCE HOSTING
(www.brilliancehosting.net)

Since i got my own server on a 100mbit connection, I got more and more questions of friends and relatives that they could host their website on my server, since then i founded Brilliance Hosting in 2006 and made it my second job. Now the company has grown into a financially healthy company with a large customer file. Because of other priorities, I sold the company in 2010 to a former competitor because it got too big for a second job.

2004 - 2005
HIDS, INTERNET, DEVELOPMENT & STRATEGY BV
(www.inapplicable)

In 2004 I got hired after a internship at HIDS as a fulltime webdeveloper. I worked in a team fo 25 webdevelopers and graphic designers. During this period i was involved in developing several websites including Weekendjeweg.nl, Nachtjeweg.nl, Pararius.com, Amrâth Hotels, Corendon.nl etc. And in that period i a nice piece of photoshopping for realelcanario.net

2005 - 2006
MORE ECONOMY BV
(www.inapplicable)

In 2005 I got transferred to parent company MoreEconomy BV. Within this company I went with a small team of five colleagues to develop for internal projects such as websites for various products and services. Mainly I've been working for the website and the CRM / CMS for sister company MoreFiber.

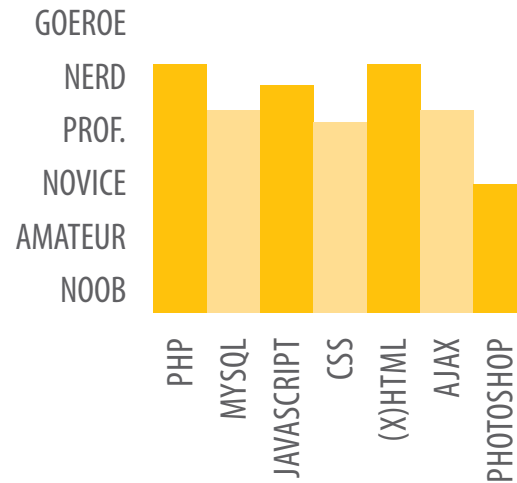

2003 - 2005
FREELANCE
(www.inapplicable)

Creating "pages" on the internet, began at an early age. Like many people i began with a profile page on a public website (networking site). Since then my skills developed and it became a passionate hobby, and soon I started to take on freelance projects for local driving schools, restaurants and cafés. In 2004 I joined the company HIDS.

Skills

- A good perception of the needs of a customer. This skill helps to develop functionality that the customer wants.
- Motivated team player with the capacity to bring sensible arguments or proposals into a debate or at a brainstorming session for new ideas.
- Enjoys motivated competition in the workplace. Inquisitive and able to quickly master new skills.
- Enterprising, likes to take the initiative. Sober, and strives for perfection.

Portfolio

Project	Virtual conference platform
Role	Architect, Lead developer
Techniques	UML, SVN, PHP 5, MySQL, HTML, JS, CSS, SHELL SCRIPT
	For TCMan.nl I made a system which facilitates websites for conferences based on a virtual platform, the administrator of the system can build websites of modules and places them visually through drag & drop. Also the system contains a comprehensive registration system where visitors can log on to participate in conferences. All data from the administrator to export. (Registration, hotel reservations, tour reservations and payments) A conference website can automatically be linked to a domain, including registrations here to be automatically executed and linked into apache using shell script.

Project	Webshop with inventory system
Role	Lead developer
Techniques	UML, SVN, PHP 5, XML, MySQL, HTML, JS, CSS
	Dalsheim.nl wanted to increase their sales area with a shop in collaboration with the client, I developed a web shop with a central inventory system. Both sold out of the shop as the shop will be controlled from the stock system to the quantity of each product as current as possible. Also, the shop linked websites like Tweakers Pricewatch Vergelijk.nl and using XML interfaces.

Project	Expansion inventory system with desk system
Role	Lead developer
Techniques	UML, SVN, PHP 5, MySQL, HTML, JS, CSS, XML
	To increase the stock system Dalsheim.nl I have a cart system developed the POS system is web-based, in a local environment. Every employee has to sign on a console (ticket) under his or her own number, and can thus add products to a ticket through a scanner that reads barcodes on the packaging. The products are retrieved from the inventory system, inventory system is central and is linked to the POS system and the shop. After each sale from the local shop stocks automatically updated. Also, through this system purchases regularly, and on receipt of goods, the packing list to be scanned so as to stocks in the system to update. In the event of a malfunction of the Internet stocks in a queue stored locally and synchronized with the inventory system when a connection becomes available.

Project	Car auction site
Role	Lead developer
Techniques	UML, PHP 5, MySQL, HTML, JS, CSS, XML, Cron
	For a Volvo dealer (volvoordeel.nl) I have a car auction web site developed, which the cars from the dealer periodically import correctly from their central system, including photo features. Then the manager of the sites by car, create an auction and publish them on the site. Visitors can register and bid at an auction as an auction progresses, the high bidder will automatically be notified and given the option to bid to confirm or deny. In case of refusal, the second highest bidder get the same option. The auction is similar to such sites as eBay.

Portfolio

Project	Webshop
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
I have a shop for goedkopebruidsjurken.nl developed a complete management environment where the customer can easily make the product groups and products can enter. Visitors to the site can make an appointment for a wedding dress on display, or directly through the shop to order and pay online.	

Project	Domain registration system with API
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
For Brilliance Hosting, and several customers I have a domain registration system has been developed which combines multiple registrars to the system, and thus allows multiple interface via a web or a few domain names to register through one central system. The system is linked with the SIDN, Enom and RRProxy. The system can be created which accounts have access to register domain names directly without intermediate person. System also contains a comprehensive administrative system that generates periodic billing for accounts that have registered domain names. The system is also directly connected to a DNS server based on replicated PowerDNS. Accounts can with an interface so the DNS records of domain names instantly adjust.	

Project	Jobs en Media storage system
Role	Lead developer
Techniques	UML, PHP 5, MySQL, HTML, JS, CSS, Apache
For Argomediagroep. Com (publisher of Villa d'Arte, OOR, Jazz magazine), I developed a system which allows for example a columnist for a job to do in the system, for example, applications of media images to use in a column, this job can be assigned to the DTP department example. Also, the system for storage of purchased or manufactured media like photos, videos and documents. These files are tagged and are per group and found department in the system. There are also the usage rights defined for each document and any costs for the media. Any media file can be used after a systematic agreement of a designated administrator.	

Project	Villa d'Arte
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS, Apache, API
For Villa d'Arte, I developed a website which is linked through an API to the Jobs and Media storage system, media system which is assigned to this website on a designated site manager used in the Content Management System the website. With the CMS administrator to a free environment to create pages, menu structures to build and activate various modules (newsletter module, contact module, banner module)	

Portfolio

Project	Customer panel
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS, DA API
<p>Brilliance for hosting customers, I have a panel created what every customer the opportunity to log in, and so list of his or her domain names and products, orders, invoices and access the support ticket system. In this panel the user can also make changes to product configurations, such as linking new and existing domain names to one or multiple hosting packages. Also has a fully integrated system with DirectAdmin's API, which allows the customer to email addresses, forwarders and technical server settings.</p>	

Project	Parque Buena Vista
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
<p>For costa rica-lifestyle.nl I have developed a website with a fully WYSIWYG content management system, has been an informative site with an extensive photo gallery in order to present the park to visitors. CMS also has the functionality for example, Dutch text to translate into English.</p>	

Project	StickerCompany
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
<p>StickerCompany.nl wanted a new website based on the old design, but optimized for the search engine's. I stickercompany.nl for a CMS integrated customer example where the meta tags, description and keywords body and thus can give an accurate description of each page may give.</p>	

Project	2uhosting
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
<p>I 2uhosting.nl for a new website developed and integrated in a self-build content management system. It is an informative website and offer visitors the ability to place orders through a dynamic form.</p>	

Project	WebRuimteHosting
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
<p>webruimtehosting.nl wanted a new website based on a content management system, and an integration with their accounting system (WeFact). I have developed a new website and order form linked to their accounting system. Orders placed are automatically handled by the system. Search engine optimization was also central to this website.</p>	

Portfolio

Project	ICPM2008
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS, Ogone

For ICPM2008.org I developed a content management system and a comprehensive registration system where visitors can sign up to participate in the conference. Visitors can also use this form to book a hotel room connected hotels. Reservations are automatically forwarded to the relevant hotel. Registration can be completed through an online payment in cooperation with Ogone payment service provider.

Project	Indus Corporation
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS

For induscorporation.com I developed a content management system that not only allow a 15 (or more) websites in the same system to manage. The 15 sites have the same design but in terms of logo and colors to fit into the CMS.

Project	The City is Yours
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS

thecityisyours.nl is an outdoor festival in The Hague and wanted a fun but informative website. In collaboration with the customer, we have launched a website completely based on HTML but combined with fun, playful JavaScript effects.

Project	ConnectingWeb
Role	Lead developer
Gebuurte technieken	PHP 5, MySQL, HTML, JS, CSS

connectingweb.nl is a young web design agency, but as a designer, it is sometimes difficult to design your own website, because you're not easily satisfied. Royal Pink has therefore been commissioned to design the website, and I have a website content management system outlet. What was central to this website was to show the references in an interactive atmosphere and beautiful.

Project	Rechtswinkel Nijmegen
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS

rechtswinkelnijmegen.nl wanted an informative and concise website management capabilities. For rechtswinkelnijmegen.nl I integrated a content management system and staff the basics of a CMS when charged.

Portfolio

Project	Auto Service Nijlan
Role	Lead developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
For car service-nijlan.nl I have a content management integrated into the website, and an occasion where the business module to their cars on display so visitors can easily look up what cars the company has sales, and easy to make an appointment via the website.	

Project	Facet Vision
Role	PHP Developer
Techniques	PHP 5, MySQL, HTML, JS, CSS
For Facet Vision I have made a licensing system with a web interface where the administrator can create these licenses, and can import their product to external servers to clients. The license is per server and unique IP Address and periodically checks for validity by the base station. Also detects the license when it is used in two different locations and will thus give a message to the administrator.	

Project	The New Master Artist
Role	PHP Developer
Techniques	PHP 5, MySQL, HTML, JS, CSS, Drupal
For newmasterartist.com I wrote several Drupal modules making it possible for artists and experts to register, Artists can add artwork and have it "approved" by an Expert.	

Project	De Regenboog Groep
Role	PHP Developer
Gebuurte technieken	PHP 5, MySQL, HTML, JS, CSS, Drupal, LDAP
Deregenboog.org the website was outdated and was up for renewal. The new website gives the customer the possibility to every aspect of the website to update and share in subsites (division in this case). Also, the site has an extensive extranet based on LDAP authentication.
